

SOFTWARE ANALYSIS AND DEVELOPMENT

"SUCCESS IS NOT IN ALWAYS
WINNING BUT IN NEVER
GETTING DISCOURAGED."

```
...ce_details['id'], $rule  
... rule as there is currently no n  
... 'access'] = !$access;  
>_sql->delete( 'acl_rules', $details );  
... date the rule with the new access value  
>_sql->update( 'acl_rules', array( 'acc  
... $this->rules as $key=>$rule ) {  
... details['role_id'] = $rule['role_id']  
... ( $access == false ) {  
... unset( $this->rules[ $key ]  
... else {  
... $this->rules[
```

INTRODUCTION

The technological training program in Software Analysis and Development is focused on the development of skills around the activities inherent to the process of creating computer applications according to the functional and technical requirements for a business solution, establishing individual and team work methods, enhancing ethical, professional and personal values, for the benefit of society and the country's competitiveness.

MOTIVATION

My motivation to study technology in analysis and software development is to improve myself and thus have a better job, I also like everything related to technology and systems and I believe that with this SENA program I can achieve my professional and personal goals. I chose this career because I can work in a team or alone as a freelancer.
